

BOLDplanning can make your Hazard Mitigation Planning (HMP) process faster, easier and more effective.

HAZARD MITIGATION PLANNING (HMP)

As an ongoing effort to reduce or eliminate risks, Hazard Mitigation Planning (HMP) is a crucial part of any preparedness program.

Since the enactment of the Disaster Mitigation Act of 2000 (DMA2000), BOLDplanning has been a leader in Hazard Mitigation Planning. Our team is unparalleled in practical HMP experience, having led numerous jurisdictions and tribal governments through the rigorous plan development and FEMA review process.

We have developed a proven mitigation planning program that works for a wide variety of public and private organizations.

A Comprehensive Approach

BOLDplanning manages the hazard mitigation planning process from beginning to end. Our approach covers the key phases of HMP: 1) organizing resources, 2) assessing risks, 3) developing a mitigation strategy, 4) adopting and implementing the plan and 5) FEMA approval and adoption.

Our proven process typically includes a wide array of organizational interactions, including on-site facilitation, stakeholder engagement, data collection and analysis, plan writing and strategy development.

PEOPLE ARE TALKING

"BOLDplanning is my first choice [for Hazard Mitigation Planning] because of their great customer service and expertise.

We utilized BOLDplanning with our current plan, and when it was time for FEMA approval, the plan was approved with some minor adjustments that were taken care of during a conference call with FEMA.

The planner was involved with us during the entire process, and I believe the open communication allowed our current plan to gain a quick FEMA approval.

By going through the planning process, we as a community were able to identify areas that mitigation would benefit by reducing the risk when a disaster occurs."

Dan H. Heerding
Emergency Management Director
City of Clovis/Curry County, NM

BOLDplanning's comprehensive HMP process includes:

- Plans built in accordance with the Disaster Relief Act of 1974 Amended; the Stafford Act 1988 Amended; the Disaster Mitigation Act of 2000 (44 CFR 201.6)
- Exceeding of IEMA's and FEMA's public process requirements in 44 CFR 201.6
- State-of-the-art GIS analysis based on HAZUS[®]-MH mapping
- Multiple workshops, held throughout the planning process
- Public presentation and outreach strategies/materials for public awareness and participation

BOLDplanning's HMP software module includes:

- Identification of hazards and risks
- Profiling of hazards and risks
- Defining of impacts and key vulnerabilities
- Identification of mitigation goals and strategies
- Identification and prioritization of mitigation projects and activities
- Tracking of the planning process and public participation

Contact BOLDplanning today for a free, no-obligation consultation.

Advanced GIS Capabilities

To support our customers' HMP needs, BOLDplanning has made significant investments in leading-edge GIS technology and training. BOLDplanning uses the most accurate geospatial data available from a host of sources, including state agencies, FEMA, NOAA, NRCS, NWS, SILVIS Labs, US Census, USACE, and the USGS.

Grant Writing

The BOLDplanning Mitigation Department offers grant-writing services related to the Hazard Mitigation Grant Program (HMGP), the Flood Mitigation Assistance Program (FMA) and the Pre-Disaster Mitigation Program (PDM). To date, BOLDplanning has written grant applications awarded more than \$5.6 million in funding.

Expert Consulting, World-Class Software Platform

Additionally, BOLDplanning's HMP consulting leverages our expertise in other preparedness disciplines, including Continuity of Operations Planning (COOP), Emergency Operations Planning (EOP), Business Continuity Planning (BCP) and training and exercising.

All of an organization's preparedness plans can be tied together and managed via our powerful online planning software platform. Edits and updates to one plan can cascade to others automatically.

Trust BOLDplanning to help facilitate a streamlined and standardized preparedness approach for your organization.

About BOLDplanning Inc.

BOLDplanning Inc. is the preeminent developer of online solutions for Emergency Operations Planning (EOP), Continuity of Operations Planning (COOP), Business Continuity Planning (BCP) and Hazard Mitigation.

Our comprehensive online platform walks planners through each step of the continuity and emergency planning process, becoming the central resource for an organization's plan development, training and ongoing maintenance. Our consulting team is unrivaled in its knowledge and experience, and includes internationally certified CBCPs, CHPCPs, FEMA certified continuity professionals (PCP/MCP) and IAEM certified emergency managers (CEM).

The BOLDplanning approach provides an unparalleled platform for both the public and private sector, making the critical process of contingency planning easy and efficient. Currently, BOLDplanning is the solution of choice for more than 10,000 organizational plans.

NOW YOU'RE READY.

Be prepared. Be **BOLD**.
